

4 Business Credit Cards for Imperfect Credit

1. Cardiff Business Rewards Credit Card

Cardiff looks at your real-time revenue, cash flow, financial health, and credit history before issuing a card. If other aspects of your business are strong, you can qualify with a credit score as low as 550 and get a 0% introductory APR for the first year.

2. Nav Prime and the Credit Builder Card

Nav focuses on helping small business owners understand, build, and manage their business credit. You can apply for the Credit Builder Card without a personal or business credit check, and Nav reports card activity to Experian, Equifax, and Dun & Bradstreet.

3. Shopify Credit

Designed for Shopify merchants who may not have excellent personal credit, Shopify Credit evaluates your business performance. The process doesn't require a personal guarantee or credit checks, and your spending limit adjusts to your sales on Shopify.

4. QuickBooks Capital and the Intuit Business Credit Card

The Intuit Business Credit Card sets credit limits from $1,000 to $50,000 based on your overall business profile, rather than a credit score. Transactions automatically sync to QuickBooks, and the card earns unlimited 2% cash back on everyday purchases.
